Election/Restriction

This application contains claims directed to the following patentably distinct species of the claimed invention:

a. Species I: claims 1-4, 6 and 7, drawn to an under bump metallization structure comprising an adhesive layer formed on bonding pads, a first barrier layer disposed on the adhesive layer, and a wetting layer formed on the first barrier layer.

b. Species II: claims 8-12 and 15-18, drawn to a semiconductor wafer comprising an active surface, a plurality of bonding pads on the active surface, a first electrically conductive layer formed on the bonding pads, wherein the first electrically conductive layer comprises a titanium layer, a nickel-vanadium alloy layer and a copper layer, wherein the titanium layer is directly attached to the bonding pads.

c. Species III: claims 20-24, drawn to a semiconductor wafer comprising an active surface, a plurality of bonding pads on the active surface, a first electrically conductive layer formed on the bonding pads, wherein the first electrically conductive layer comprises an aluminum layer, a nickel-vanadium alloy layer and a copper layer, wherein the aluminum layer is directly attached to the bonding pads.

1. The species are independent or distinct because claims to different species recite mutually exclusive characteristics of such species. In addition, these species are not obvious variants of each other based on the current record.

2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently there is no generic claim.

3. There is an examination and search burden for these patentably distinct species due to their mutually exclusive characteristics. Furthermore, the species require different fields of search and the prior art applicable to one species may not be applicable to another species. The species are also likely to raise different non-prior art issues under 35 U.S.C. 122, first paragraph.

4. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

5. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

6. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

Art Unit: 2814

the prior art, the evidence or admission may be used in a rejection under 35

U.S.C. 103(a) of the other invention.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Abul Kalam whose telephone number is 571-272-8346.

The examiner can normally be reached on Monday - Friday, 9 AM - 5 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wael M. Fahmy can be reached on 571-272-1705. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
